

THE FUTURE IN MOTION

Turck & MTA are
shaping the digital
transformation

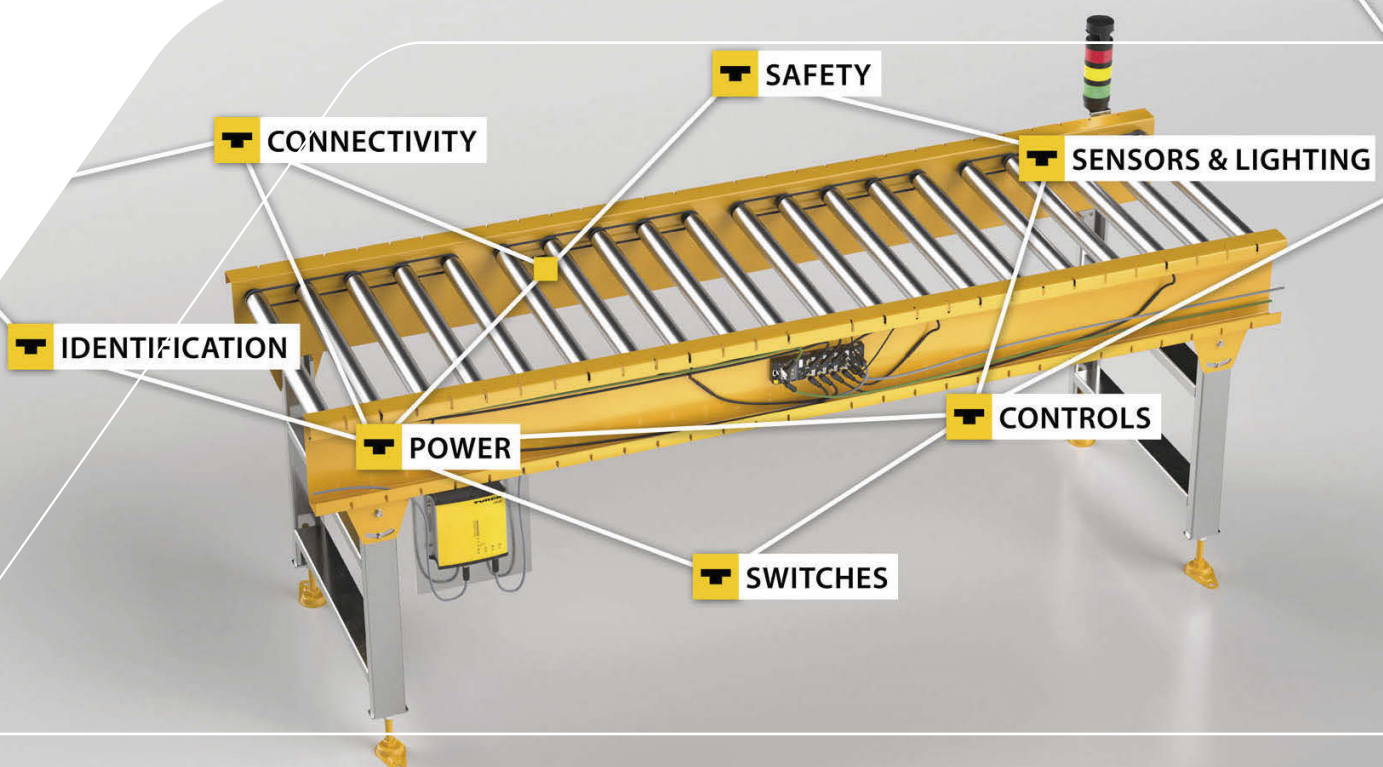

Intelligent drive technology meets smart communication

For modern logistics solutions in intralogistics and airport logistics. A technology partnership between Turck and MTA.

MTA and Turck combine their strengths – for a new era in conveyor and sorting technology. Our joint solution enables intelligent systems that perform better, communicate more efficiently, and are ready for tomorrow.

Added value: Integrated, forward-looking complete solutions for internal material flow.

TURCK
Your Global Automation Partner

PARTNERSHIP

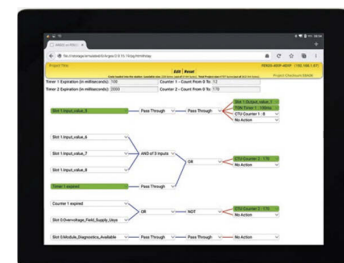

Two specialists - one powerful solution.

MTA develops high-performance drive components – Turck supplies the digital infrastructure. Together, we are enabling the smart conveyor technology of tomorrow.

- Combination of intelligent drive technology and innovative communication
- Complete solutions for the digital transformation of conveyor and sorting systems
- Scalable solutions for any system size
- Real-time data for monitoring, analysis, and maintenance

From the drive to the cloud – everything connected, everything in view.

Our technology enables the digitization of conveyor and sorting systems at all levels—from individual components to complete system integration.

PROFIBUS
EtherNet/IP

“Our technology partnership
is driving
digital transformation.”

AREAS OF APPLICATION

Flexible. Scalable. Cross-industry - the right solution for every challenge.

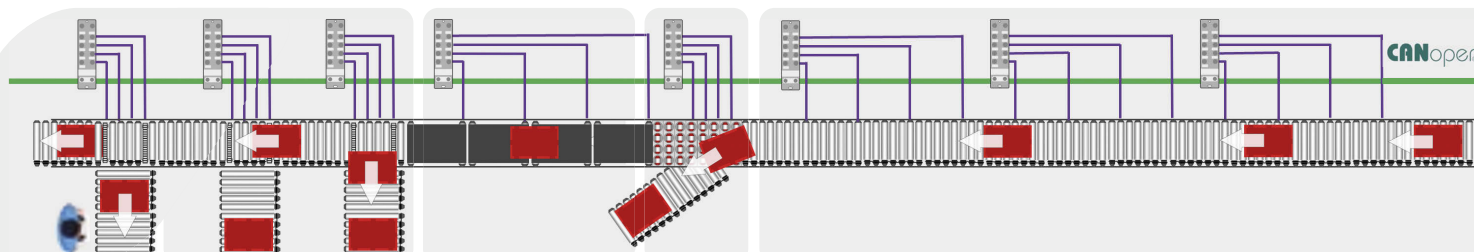

Together, we implement efficient processes in conveyor and sorting systems:

- | | |
|---|--|
| Intralogistics: <ul style="list-style-type: none"> • Container conveyor technology • Mail and parcel conveyor technology • Pallet conveyor technology | Airport logistics: <ul style="list-style-type: none"> • Baggage handling systems • Sorting solutions for check-in and loading |
|---|--|

Container conveyor technology

Consistent, modular, flexible - smart solutions for box and container technology.

- Real-time data transparency for analysis and optimization
- Predictive maintenance thanks to intelligent diagnostic data
- Reduced downtime and higher plant availability

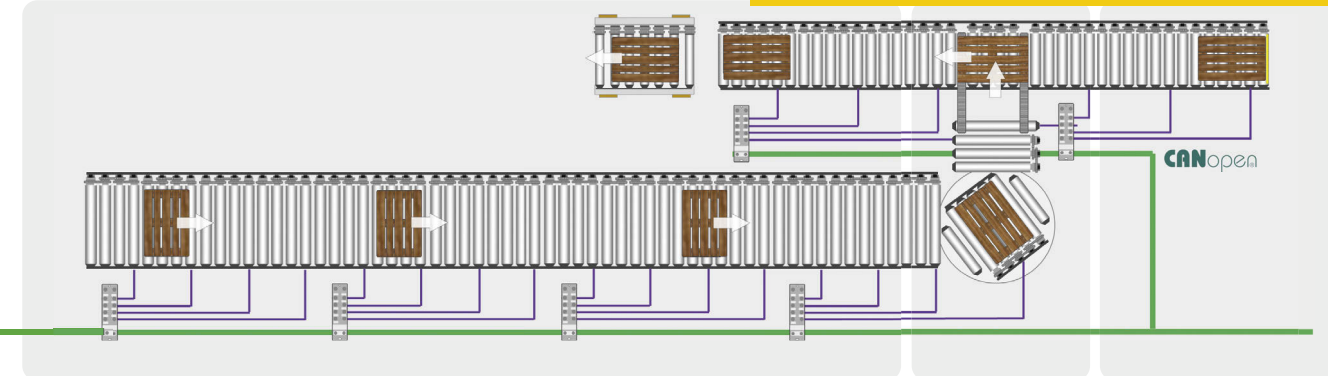

Pallet conveyor technology

Heavy loads, easy control – digitized pallet logistics.

Robust drive technology meets smart networking: our approach to efficient pallet conveying.

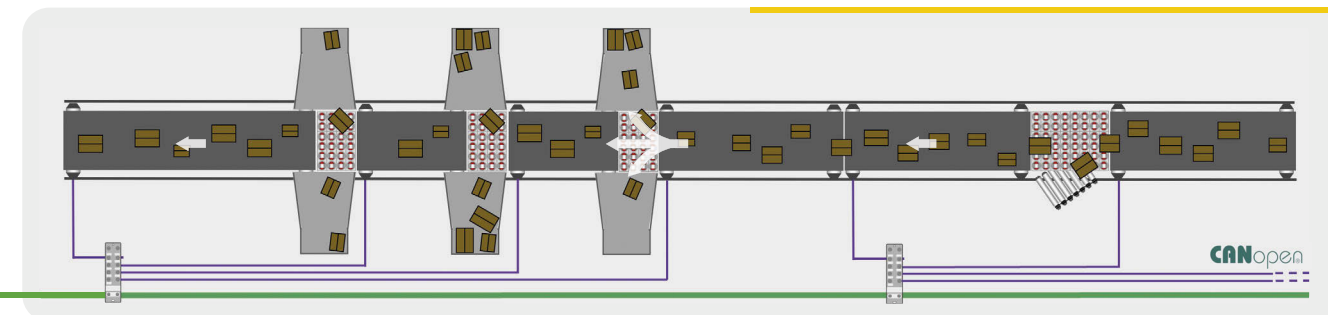

- Scalability from small to large-scale systems
- High energy efficiency thanks to precise drive solutions
- Future-proof thanks to open communication standards

Mail and parcel conveyor technology

Conveying, distributing, and sorting—all at high speed. Efficiency that connects—technology meets intelligence.

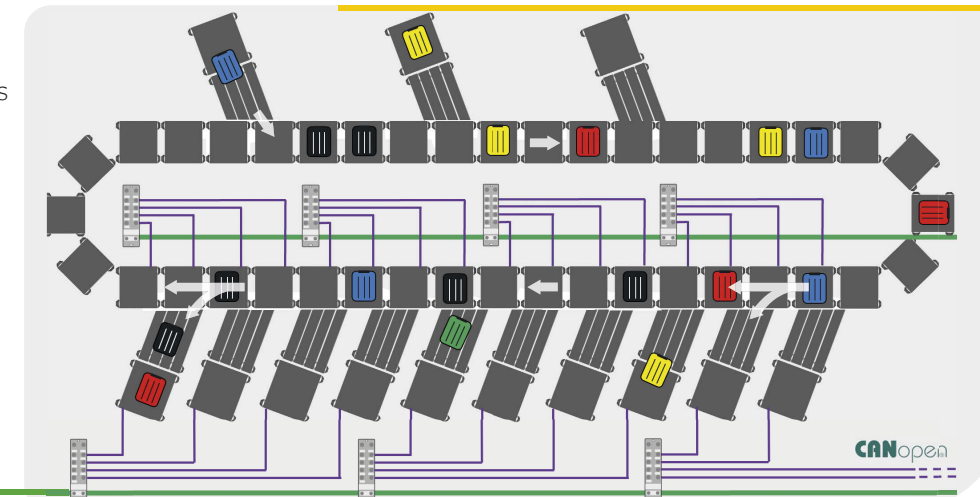

The perfect synergy: MTA supplies robust, precise drive components. Turck provides digital networking and real-time transparency.

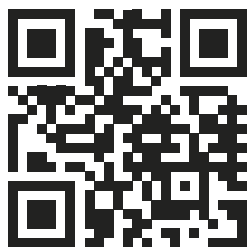

Airport logistics

Efficient baggage transport – precisely and smartly controlled

- Scalability from small to large-scale systems
- High energy efficiency thanks to precise drive solutions
- Future-proof thanks to open communication standards
